Example of GPE dividend/common stock value on Day 1*

Some of you have asked how much the combined company's dividend will be worth for Great Plains Energy Incorporated (GPE) shareholders after the merger. The short answer is, **the dividend value is expected to remain the same.**

That's because GPE shareholders will receive 0.5981 shares of common stock in the combined company for each GPE share on Day 1, but it's expected that the combined company's board will declare a higher dividend payout. Here's an example of how someone who owns 100 shares of GPE common stock would be impacted:

	GPE Before Day 1	NewCo Day 1
Shares of common stock	100	59*
Annualized dividend per share of common stock	\$1.10	\$1.10 / 0.5981 = \$1.84
Expected annual dividend income + cash in lieu of fractional shares of common stock	\$110	\$108.51 + \$1.49* = 110.00

**Holders are expected to receive whole shares (59 shares in our example) + cash in lieu of fractional shares.*

It's impossible to accurately predict the market price of the combined company common stock to be received by GPE shareholders after the merger completes. However, it's expected that on Day 1, the implied value of GPE common stock could be in line with the 0.5981 exchange ratio. Here's an example of how someone who owns 100 shares of common stock would be impacted:

	GPE Immediately Before Day 1	Implied Value of NewCo Day 1*
Shares of common stock	100	59**
Price per share*	\$32.15	\$32.15 / 0.5981 = \$53.7536
Implied value + cash in lieu of fractional shares of common stock	\$3,215.00	\$3,171.46 + 43.54 = \$3,215.00

**This example is purely for illustrative purposes and doesn't guarantee a market price for the equity of either the combined company or GPE.
**Holders are expected to receive whole shares (59 shares in our example) + cash in lieu of fractional shares.*
